Ostrava - AT Computers raised turnover by 9.3 percent to Kc8bn last year, and with over 50,000 computers sold kept the number one position on the personnel computer market, the company told ČTK in a press release.

AT Computers also strengthened its number two position in the distribution of IT technology on the Czech and Slovak markets, also thanks to new contracts with companies like Microsoft, Canon, MSI, Genius and Lexmark.

AT Computers is one of the biggest wholesale companies in the IT segment in the Czech Republic and Slovakia.

It was established as a joint-stock company in 1998 from the wholesale part of the AutoCon holding.

AT Computers focuses on production and distribution of personnel computers, production of notebooks and distribution of brand components for computers and notebooks.
